Subject: Important Update to Socoglaze Product Line Offerings

At Socomore, our mission is to provide the aerospace industry with the highest-quality, most reliable surface treatment and coating solutions. As part of our ongoing commitment to operational excellence and long-term growth, we have conducted a comprehensive review of our Socoglaze product line, originally acquired from PTI.

Over recent years, many of the legacy qualifications are approaching the end of their lifecycles, and overall demand has significantly declined. At the same time, we have experienced challenges in maintaining consistent production for certain products, driven by the highly specialized skill sets these formulations require.

Moving forward, Socomore will continue offering only the following Socoglaze ex-PTI line products:

- **PT-522** (chrome and non-chrome versions) per TT-P-1757
- **PT-402** (chrome and non-chrome versions) in yellow chromate per MIL-C-8514
- **PT-1045 thinner** (in support of PT-402)
- **PT-1003 thinners** (in support of Socoglaze 85285 topcoats) per MIL-DTL-81772
- **Socoglaze 85285** (in various colors) per MIL-PRF-85285 (QPL)

We are committed to working closely with you to support your transition needs. We greatly appreciate your understanding as we make these strategic adjustments.

For the newly discontinued items, we will do our best to accommodate fulfilling all orders placed before September 1st, 2025. Some products, due to raw material replacements or significant raw material price increases may have new pricing, longer lead times or may not be able to be fulfilled. When placing an order, customer service will confirm any price or lead time changes.

If you have any questions or would like to discuss your specific needs, please contact your Socomore representative. Thank you for your continued trust and partnership.

Best Regards,

Erik Weyls
Executive Vice President – Socomore Rhome
