Important Update: Color Change on the Button at the Back Side of Select 3M Roloc™ Discs

Dear Valued Customer,

At 3M Abrasives Division, we are committed to continuously improving our products and services to better meet your needs. As part of our ongoing efforts, we are making a change to the color on the button at the back side of a limited set of our Roloc™ discs. Going forward, all buttons will be white. The grade will be printed on the back of the disc itself, so there will be no need to identify the disc grade by the color of the button.

This change has been qualified through our formal “management of change” process to maintain the high quality and performance you expect from 3M products.➤

Key Information:

- **What is Changing:** The color on the Roloc TR and TS plastic buttons on the back side of singly-ply cloth and fibre 3M™ Roloc™ discs will be white. The specific product family and grade of every disc will be pre-printed at the back of the disc itself. Discs affected include:
 - 361F, 777F, 782C, 787C, 982C, 987C, 1182C, 1187C
 - Durable Edge discs already use white buttons.
 - Metal buttons will no longer have the grade stamped on the button.
- **Reason for Change:** A change to product input and color of the button at the back which will always be white, while facilitating the identification of the grade by pre-printing the grade at the back of the disc itself.
- **Impact on Product:** There will be no impact on the quality or performance of the 3M™ Roloc™ discs.
- **Effective Date:** This change will begin immediately and continue over the next several months.

We understand that changes can sometimes raise questions. Our team is here to support you and provide any additional information you may need. Please feel free to reach out to your 3M Sales Representative, contact our Customer Service team at 1-866-279-1235, or call the 3M Help Line at 1-888-3M-HELPS.

Thank you for your continued trust in 3M. We look forward to serving you with our improved products.

Best regards,

Mike Eggert
